

SHEIKH MANNAN JAVEED

✉ smjaveed94@gmail.com | 📞 8867589190 | 🌐 github.com/sheikhjaveed | 🔗 linkedin.com/in/sheikh-javeed

Summary

Computer Science undergraduate with experience building AI-powered applications, agentic systems, and scalable backend services. Skilled in GenAI, RAG, distributed systems, and full-stack development, with hands-on experience developing production AI observability platforms, multi-agent applications, and cloud-integrated solutions.

Skills

Programming: Python, Java, C/C++, JavaScript, TypeScript, SQL

AI & Machine Learning: Generative AI, RAG, LangChain, Vector Databases

Frameworks & Libraries: React.js, Node.js, Express.js, FastAPI, Next.js, Flutter, Jetpack Compose, Tailwind CSS

Databases: PostgreSQL, MySQL, MongoDB, ChromaDB, Elasticsearch

Tools & Platforms: Git, GitHub, Docker, Kubernetes, Postman, Azure Cloud, WorkManager, REST APIs

Education

B.E. in Computer Science

Ramaiah Institute of Technology

Grad. June 2026

CGPA: 8.89/10 | Bengaluru, India

PUC — PCMB

MES PU College

Apr 2022

Percentage: 96.8% | Bengaluru, India

Experience

AI Engineer

BaseThesis Labs

June 2026 – Present

Bengaluru, Karnataka, India

- Built the **Projects** feature for **Synth**, an AI-powered financial assistant, enabling persistent memory and contextual conversations across multiple chat sessions.
- Developed end-to-end **Tally integration**, implementing tool calls and backend workflows that allow users to securely retrieve accounting and financial data directly through Synth's conversational interface.
- Designed and integrated **AI agent workflows** with backend services, improving context retention, tool execution, and response reliability for production deployments.

Full Stack Developer Intern

Hertzwave Innovation Private Limited

Jan 2026 – May 2026

Bengaluru, Karnataka, India

- Developed and maintained **REST APIs** for production applications, focusing on request handling, validation, and error management.
- Integrated **AI-powered services** into **Node.js/React (MERN)** applications, enabling seamless backend–frontend communication.
- Designed scalable backend workflows and service-level logic to support future feature expansion.

SDE Intern

Hertzwave Innovation Private Limited

Sept 2025 – Dec 2026

Bengaluru

- Built a **Compliance Mapper** for generating **BRSR sustainability reports** using organizational and emissions data.
- Developed backend APIs for report configuration, preview, generation, and **Scope 1/2/3 emissions mapping**.
- Integrated **AI-assisted field mapping** and implemented PDF processing/export for automated report generation.

Projects

Agentic SRE: Memory-Augmented Incident Response [\(GitHub Link\)](#)

- Built an **agentic SRE system** that retrieves and recommends fixes for production incidents using **semantic memory** instead of rule-based troubleshooting.
- Implemented incident recall using **Elasticsearch vector search** and **all-MiniLM-L6-v2 embeddings**, storing root causes, resolutions, and operational commands as long-term memory.
- Developed a reasoning pipeline that analyzes live error logs, retrieves similar historical incidents, and generates actionable remediation steps without hardcoded rules.

Intelligent Offline Messaging App [\(GitHub Link\)](#)

- Developed an **offline-first Android messaging app** using **Kotlin, Jetpack Compose, Room, Hilt, and MVVM**, ensuring reliable local persistence and seamless user experience.
- Implemented **WorkManager-based background synchronization** with conflict resolution, message versioning, and guaranteed delivery across app restarts and network interruptions.
- Optimized performance with Media3 video login, delivery-status tracking, connectivity indicators, and memory-efficient chat rendering (**<200MB RAM usage**).

MindArena: AI Debate Club [\(GitHub Link\)](#)

- Built a **multi-agent AI debate platform** with Pro, Con, Moderator, and Judge roles using **RAG** and state-driven debate orchestration.
- Integrated a **ChromaDB vector store** containing **1.5M+ IBM Debater claims** and **all-MiniLM-L6-v2 embeddings** to ground arguments and reduce hallucinations.
- Developed a **FastAPI + React** application with LangChain workflows, Gemini Flash generation, automated judging, and real-time debate scoring.

Awards & Certifications

- **Xenith Hackathon — 4th Place - Dayanand Sagar College of Engineering** (May 2025)
- **Complete Web Development Course — Udemy** (May 2025)
- **Advaya Hackathon Participant — 6h place - BGSCET College, Bengaluru** (Apr 2025)
- **Pandas in Python — Kaggle** (Nov 2024)
- **Automate the Boring Stuff with Python — Udemy** (May 2024)
